## Tool Tip: ctags(1)

---

```
Terminal — 80x24
[$ ssh apue
Last login: Wed Sep  2 17:52:15 2020 from 10.0.2.2
NetBSD 9.0 (GENERIC) #0: Fri Feb 14 00:06:28 UTC 2020

Welcome to NetBSD!

apue$ █
```

## **ctags(1)**

---

Use `ctags(1)/exctags(1)` for your source code as well as the system's source:

```
exctags -f ~/.tags -R -I __weak_alias --languages=C,C++ /usr/include /usr/src/lib  
echo "set tags+=~/.tags" >> ~/.vimrc
```

Use `Ctrl+]` to jump to the definition, `Ctrl+t` to return.

Use `"K"` to pull up the manual page for the word under the cursor.
